SKIILLS

Technical: Log analysis, Incident Response, SIEM, Endpoint Detection and Response (EDR), Vulnerability Management, SOAR
Stack: AWS, Splunk, Wazuh, ELK Stack, LimaCharlie, Tines, Nessus, Accunetix, Postman, Burpsuite, Wireshark, Metasploit, Nmap, JavaScript, Python, Bash

EXPERIENCE

Dronapay Pvt. Ltd. **Oct 24 - Dec 24**
Cybersecurity and Infrastructure Associate

- Managed security alerts, applied remediation strategies, and reduced alert noise by 22%.
- Conducted root cause analysis for critical incidents, enhancing incident response playbooks.
- Supported internal and external audits by gathering evidence, preparing documentation, and addressing findings to ensure compliance.

University of Mumbai **Oct 24 - Dec 24**
Full Stack Web Developer

- Designed and developed a secure, dynamic website for a government project, ensuring compliance with security protocols.
- Built a robust backend system for data collection and analysis, supporting project objectives.
- Developed interactive data visualization tools to enhance user experience and decision-making

Freelancer **Dec 23 - Apr 24**
Penetration Tester

- Led multiple VAPT projects with a team across various industries, identifying critical vulnerabilities such as HTML injection, directory traversal, and XSS.
- Provided stakeholders with actionable remediation strategies to enhance security.
- Delivered comprehensive reports, improving client's security posture through targeted recommendations

Pristine InfoSolutions Pvt. Ltd. **Mar 21 - June 21**
SOC Analyst Intern

- Conducted log analysis, risk assessments, and vulnerability management to enhance organizational security and reduce attack surfaces.
- Implemented effective mitigation strategies and optimized playbooks to strengthen the organization's security posture.
- Reduced phishing attacks by 15% through the creation and enforcement of comprehensive security policies.

CERTIFICATIONS

- CompTIA Security+
- Google Professional Cybersecurity Certification
- Fortinet Certified Associate - Cybersecurity
- Cisco Cyber Threat Management
- TryHackMe Junior Penetration Tester

PROJECTS

Automating Incident Response with LimaCharlie (EDR), Tines (SOAR), and Slack

Objective: To design and implement an automated workflow for real-time threat detection, alerting, and containment, reducing incident response time and enhancing security operations.

Skills Learned: EDR configuration, SOAR automation, API integration, incident response, and attack simulation.
